ELECTRIC

Flyers to Barberton.

Cars Will Make Run In
18 Minutes.

Northern Ohio Traction
Company's Survey.

Double Track Through Private
Property.

Two Cities United—Big Thing For
Akron.

The Northern Ohio Traction com-
pany is going to carry passengers be-
tween Hall's Corners, at Akron, and
the Inn, at Barberton, in 18 minutes.

This will equal the time of the
steam cars, with the advantage that
electric car passengers will be land-
ed at more convenient points in the
two cities and can catch cars at more
convenient times.

For the last six weeks the com-
pany's engineers have been quietly
at work surveying lines through private
property, starting at points on
South Main st., south of Falor's
Crossing, and continuing to Barberton,
the object being to find the route
and levels best adapted to the com-
pany's plan of rapid transit between
the two cities.

It is understood that the favorite
of the three routes eliminates all
necessity of curves and grades, short-
ening the distance to the minimum
and giving the company opportunity
to create a road-bed that will com-
pare favorably as to levels with the
steam railways.

The right of way calls for a double
line of track, which, completed, will
connect with the South Main st.
tracks, enabling the company to run
cars either way between Hall's Cor-
ners at Akron and the business
quarter of Barberton in 18 minutes!

It is announced that the road-bed
is to be equipped with the best ma-
terial that can be obtained; and the
cars, of the latest improved kind,
will be capable of developing a speed
of upwards of sixty miles an hour.

With the running time of electric
cars reduced to 18 minutes, Akron
and Barberton will be a closer united
socially and commercially than ever.

Baehel property, on Water street
between Exchange and Bowery, for

two years, 6 per cent interest, se-
cured by mortgage.
